

Insight Doc Translator

Translate multilingual documents, instantly, accurately, beautifully.

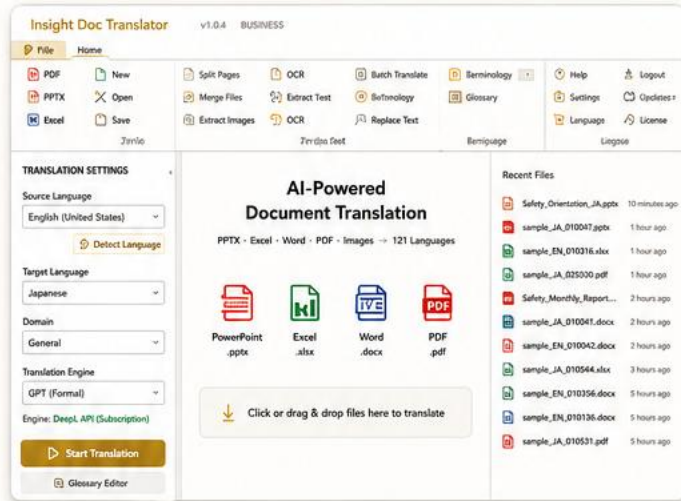

Translate PDF, PowerPoint, Word, Excel and keep the layout—into any language.

Turn outsourcing and in-house translation around. Finish in 10 minutes what used to take a day.

Just drag & drop your files to translate while preserving the original layout.

No manual work in ChatGPT or other AI tools.

Always up-to-date terminology with automatic glossary updates.

4 Supported File Types
PDF / PPTX / Word / Excel

47 Languages
Comprehensive coverage with 11 language packs

6 Translation Engines
Claude / DeepL / Google / Azure / Gemini / OpenAI

Layout Preservation
Maintain fonts, tables, charts, and formatting

SOLVES THESE CHALLENGES

AI translation tools lose formatting and ruin your documents.

Recreating layouts takes too much time.

Worried about mistranslations or inconsistencies.

Need to process large volumes of files and multiple languages.

KEY FEATURES

1 Drag & Drop to Translate
Just drop your files. No copying or pasting required.

2 Keep the Original Layout
Preserve the look and feel of PDF, PPTX, Word, and Excel.

3 Glossary & Translation Memory
Ensure consistency with glossary, mistranslation prevention, and TMX support.

4 Natural, High-Quality Translation
Deliver natural, localized content with native-level accuracy.

5 Multi-Engine Translation
Combine multiple files and engines for the best result.

6 File Comparison & Review
Compare with the original and export differences. Includes bilingual view.

Home Screen

Start immediately from an intuitive home screen.

Translation Job Screen

Review and edit projects, confirm translation, and export.

Batch Translation

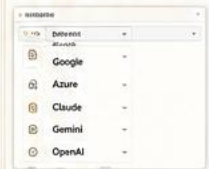

Combine multiple files and translate all at once with drag & drop.

Multilingual Translation

Translate one file into multiple languages at once.

Multi-Engine Selection

Select the best engine or combine multiple engines.

File Comparison

Compare with the original and export differences. Bilingual view available.
